

# Wild Summer at Croton Point Park

Set Your Imagination Free

## River Explorers

The wonders of the Hudson River never cease to provide new opportunities to explore. From the history of the river to the science of waterways, learn the skills and science behind rocks, shells, the cycle of water and the ways our aquatic friends exist in the environment.

Come to Croton Point Park and experience the joys of summer in one of Westchester's most Dynamic spaces. Hike the riverside and find shells, fish, and adventure, run and play in the open fields, and discover hidden secrets in the woods.

**Shipwrecked Pirates** is one of our most popular themes--one that focuses on survival and teamwork through the lens of a school favorite--pirates! Collect resources, rebuild your ship, and escape with your treasure! But watch out...there are castaways around, and they want your treasure too!

**Desert Island Survival** brings skills to the forefront that you can use in times of need, or in times of fun! Build shelter, collect water, make tools, and work together to survive in the elements. Curiously, there may be a group of pirates nearby, and a treasure that's up for the taking...How will you survive on the island of Croton Point?

## Stone Age Tinkerers

Expand your understanding by returning to the very basics of humanity. What sort of tools did we make? What skills did we learn? Do it all yourself! From fire making to shelter building to tool creation--engage with the foundations of what our school is based around. This theme combines the benefits of learning how to use tools and skills to influence the natural world. And of course, a lot of exploration and imagining to supplement those lessons.

**Hunter Gatherers** is the perfect way to introduce your child to the exciting skills of the forest. Gather plants, berries, and other supplies to cook around a campfire, make shelter, and learn important identification techniques. This skill-based class delivers some of our most important skill work through the lens of our oldest ancestors.

## The Benefits of Summer Outdoors

Why choose RWS this Summer? Our programs focus on combining real education with exploration and fun. Our kids spend their summer outdoors, learning, playing and building new skills that are not often available in one program. Satisfy your child's need for real experiences and escapist fun by picking themes your child will love, and let us do the rest.

**Forest Craft** is our take on the popular survival video game genre. Whether it's mining blocks or surviving in the Forest, these kids have the opportunity to step into their favorite franchises. Build shelter, make fire, use tools and learn how to become your favorite protagonists in our newest, most popular program.

If you want to have access to our Summer Preschool, available for kids aged 3-5, head on over to our Mt. Kisco guide to learn more. We unfortunately do not offer the program at Croton Point.
